But 10,000 years ago is difficult to imagine - what if our calendar were condensed into just 100 days, where each day equals 100 years? How many days ago were the first cities built? When did the population explosion happen? When did we decide to write things down and when did books appear? Did writing change the way we share ideas? This book asks questions big and small, leaving readers wondering if all the changes have been for the better, and what does it mean for our future.
